PROFILE

Software Engineering BSc candidate specializing in Software & Information Technologies, with hands-on experience building full-stack web applications using React, Node.js, Express, MongoDB, PostgreSQL, C#, .NET, and REST APIs. Seeking junior software developer / full-stack developer opportunities.

EDUCATION

Afeka Tel Aviv Academic College of Engineering | 2023 - Present

BSc Software Engineering: Specialization in Software & Information Technologies

SELECTED PROJECTS

Afeka Trails - AI-Based Trip Planning Platform | 2026 | *Next.js, React, Express, MongoDB, JWT, OpenRouter, Leaflet, GraphHopper, OpenWeatherMap*

Live: afeka-trails-2026-three.vercel.app | GitHub: github.com/JolianHabib/afeka-trails-2026

- Built and deployed a full-stack AI trip-planning platform with JWT access/refresh authentication, protected routes, MongoDB route history, interactive maps, weather data, and AI-generated trail recommendations.
- Integrated OpenRouter, Leaflet/GraphHopper routing, OpenWeatherMap weather, Unsplash images, and REST APIs across a Next.js frontend and Express/MongoDB backend.

DotNet Game Project - Client-Server Checkers Game | 2026 | *C#, ASP.NET Core, WinForms, EF, SQL Server, HTTP APIs*

GitHub: github.com/JolianHabib/DotNet-Game-Project

- Developed a client-server Checkers game with a WinForms desktop client and an ASP.NET Core server communicating through HTTP APIs.
- Implemented player management, game and move tracking, SQL Server persistence with Entity Framework, and replay functionality for completed games.

ExamSystem - Academic Exam Management System | 2025 | *Java, OOP, JDBC, PostgreSQL*

GitHub: github.com/JolianHabib/ExamSystem

- Built a menu-based Java console application for teachers to manage subjects, questions, answers, and exam creation workflows.
- Designed a PostgreSQL database with 7 related tables and JDBC connectivity to support relational exam data storage and retrieval.

Medical Clinic Database | 2025 | *PostgreSQL, SQL, PL/pgSQL, ERD, Triggers, Constraints*

GitHub: github.com/JolianHabib/Medical-Clinic-Database

- Designed a relational database schema for a medical clinic, including tables, constraints, sample data, and business rules.
- Implemented analytical SQL queries, PL/pgSQL triggers, and validation logic to support realistic clinic data operations.

TECHNICAL SKILLS

Languages:	Java, JavaScript, C#, Python, SQL, C
Frontend:	React, Next.js, HTML, CSS, Vite, Responsive UI
Backend:	Node.js, Express, REST APIs, JWT Authentication, Validation, CORS, .NET fundamentals
Databases:	MongoDB, PostgreSQL, SQL Server, ERD, SQL Queries, PL/pgSQL, Triggers, Constraints
Tools:	Git, GitHub, VS Code, Postman, Vercel, Render, MongoDB Atlas
Concepts:	OOP, SOLID Principles, Design Patterns, Data Structures, Algorithms, Client-Server Architecture

RELEVANT COURSEWORK

Data Structures, Algorithms, Object-Oriented Programming, Databases, Web Development Platforms, .NET Platform Programming, Operating Systems, Computer Networks, Secure Development.
